

TAX INVESTIGATIONS SERVICE

In order to achieve its target of £24.5bn of additional tax yield, HM Revenue & Customs (HMRC) has brought together operational research officers, data specialists and frontline tax experts to form a results driven team to deliver compliance results.

Data and IT

Connect is HMRC's award winning data system which trawls through over one billion records relating to property transactions, tax return information, loans, bank account details and employment data to identify potential targets for investigation.

Increased activity

The number of individuals being investigated by HMRC has doubled to 240,000, compared with 119,000 in 2011-12.

Targeting

More than £600million has been delivered from targeted campaign activity into professions and trades such as medics, plumbers and electricians. Further campaigns and taskforces are planned throughout the tax year.
